

SHOREFIELDS SCHOOL – PE and Sports Premium Statement

This funding has been provided by the government to improve the quality and breadth of PE and Sport provision

For the 2018/19 academic year we will receive an estimated £TBA and propose to:

- Provide swimming lessons at local swimming pool with an instructor, for appropriate classes
- Provide opportunities for classes to take students swimming on a regular basis at the local pool and hydrotherapy pool
- Book the Leisure Centre for weekly sessions on two courts
- Purchase outdoor gym equipment for student use, including preparing the area and installing surfaces and the equipment
- Trampoline training for a group of staff members
- Hawk Farm outdoor provision, which provides students with gross motor and fine-motor activities

How will we measure the impact of this expenditure?

We will use formative assessment of the pupils' development in the areas of fine and gross motor skills, personal and social development, health and well-being.

We will assess progress using Tapestry to record and track the development areas

Our aim is to impact student's well-being and health long-term, so that they are confident and keen participants in a range of physical activities, not only during the time they are in school, but also as they transition to adulthood. We aim to offer them as many experiences as possible during their time at Shorefields, so that sporting activities become part of their daily lives, which will increase their physical skills and stamina, social skills and engagement with their local community.

For the 2017/18 academic year we received £16,450 and allocated the grant as follows:

- Weekly swimming sessions at community pool
- Sports and PE equipment, including PE team uniforms
- Coaching
- Participation of groups to Multi-Sports events in the Essex area, joining other Special Schools
- Football tournament

What was the impact of this expenditure?

Pupils had opportunities to enjoy and participate in sports events with external school provisions

Pupils benefitted from regular swimming activities to progress their skills

Pupils were provided Trampoline lessons at school

Pupils engaged in a range of physical and sporting activities to better their health and well-being
