"We are very pleased to have had fitted our brand new AED defibrillator for use during emergencies in school.

Whilst we sincerely hope we will never have to use this, we recognise our part in keeping our school community safe and being prepared for all eventualities. It is estimated that approximately over 30,000 people suffer a cardiac arrest in England each year and therefore with an AED, combined with timely CPR, the chances of survival increase dramatically.

As a school we would like to thank London Hearts for their help in obtaining some charity funding to go towards the cost of purchase."
